DETAILED ACTION

This is a reply to the Applicant's amendment submitted on 05/31/2005.

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's representative, Mr. Richard Sharkansky, on 06/29/2005.

The Examiner's Amendment includes:

CLAIMS:

Claim 4: line 8, insert --first-- in front of "resistor";

insert --a first-- in front of "one";

Line 9, insert --"a second resistor connected between a second one of the input terminals of the differential amplifier and one of the pair of reference voltages--;

Line 11, replace "signals voltage" with --voltages--;

Claim 7: line 1, delete "is";

Claim 9: line 1, replace "10" with --18--;

Claim 10: line 5, before "," insert -- , the first voltage divider network having a pair of resistors, a first one of the pair of resistors, R1, being connected between a first one of the pair of reference voltages and the non-inverting input and a second one of the pair of resistors, R2, being connected between the non-inverting input and a second one of the pair of reference voltages";

line 10, delete "including";

Claim 11: line 17, insert --first-- in front of "resistor";

insert --a first-- in front of "one";

Line 19, insert --"a second resistor connected between a second one of the input terminals of the differential amplifier and one of the pair of reference voltages--;

Claim 12: line 1, delete "the regeneration circuit";

Claim 16: line 5, delete "to" (first occurrence);

Line 8, replace "roviding" with --providing--;

Claim 17: canceled.

Claim 18: line 1, replace "17" with --10--;

Claim 20: canceled.

Allowable Subject Matter

2. Claims 4-7, 9-16 and 18-19 are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The closest prior art fails to disclose or fairly suggest:

a) A clock regeneration circuit including a second resistor connected between a second one of the input terminals of the differential amplifier and one of the pair of reference voltages, in combination with the remaining claimed limitations, as called for in independent claims 4 and 11; and

b) A clock regeneration circuit, in which the source of clock pulses is a transistor-transistor logic circuit having an output transistor, such output transistor having an emitter and

collector coupled between the pair of reference potentials, and including a coupling resistor R5 serially connected between the collector electrode and the non-inverting input through the transmission line, such resistor R5 being selected to provide a predetermined proper voltage swing across the non-inverting and inverting inputs, in combination with the remaining claimed limitations as called for in claim 10 or claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
